

Random Number Generator Certificate

Operator: The Flash Poker Network

URL: www.theflashpokernetwork.com

This is to certify that [iTech Labs](http://www.itechlabs.com) has evaluated the Random Number Generator (RNG) used for card games in The Flash Poker Network System, and found that the RNG complies with the relevant UK Gambling Commission, Alderney Gambling Control Commission and iTech Labs standards.

The RNG use a widely recognized algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has also evaluated the scaling of the numbers and shuffling of the cards. Chi-squared tests were applied to a total of 5.16 million shuffled decks. These tests were conducted on 210 sets of shuffled decks, each set ranging from 1,000 to 500,000 decks. The tests were applied to suits 1-4, ranks 1-13 and cards 1-52. iTech Labs has found that the card sequences are unpredictable and non-repeatable.

The certified code for the RNG has been fingerprinted.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
